EDUCATION

The University of Alabama **Tuscaloosa, AL**
B.S. Management Information Systems | GPA: 3.0 *December 2025*

TECHNICAL SKILLS

Languages: JavaScript, C#, C, Python, PHP, SQL, Luau, HTML, CSS

Frameworks & Libraries: React, Next.js, Node.js, Express.js, ASP.NET Core / .NET, React Native, jQuery, Alpine.js, Prisma, Tailwind CSS, SASS, Liquid

Databases & Tools: MySQL, PostgreSQL, Git & GitHub, Postman, Swagger, Thunder Client, MySQL Workbench, HeidiSQL, XAMPP, VS Code, Excel

Systems & Networking: Active Directory, Group Policy, VMware, Windows Firewall & Defender, DMZ, port forwarding, QoS

EXPERIENCE

Fullstack Developer **February 2025 – Present**
FastHealth Corporation *Tuscaloosa, AL*

- Build and maintain REST API endpoints secured with JWT authentication, tightening access control across internal applications.
- Modernize the in-house PHP content management system, cutting manual steps out of daily internal workflows.
- Rebuild front-end pages with responsive CSS, delivering consistent layouts across desktop and mobile.
- Document undocumented legacy code, shortening onboarding time for new developers and easing future maintenance.
- Build FastCommand Weather with React Native and Expo for iOS and Android, delivering scheduled weather updates and location-aware severe-weather alerts.

Data Analyst / Fullstack Developer **August 2025 - October 1, 2026**
Embrace Alabama Kids *Montgomery, AL*

- Partnered with the VP to build reporting on student and applicant data that leadership used to guide program decisions.
- Integrated a Next.js front end with authenticated Zoho Analytics APIs to surface real-time program metrics.
- Reworked existing jQuery forms with clearer validation, improving submission accuracy and user experience.
- Built an app that assigns chores and manages scheduled rides for scholars.

Front End Web Developer Intern **August 2024 – December 2024**
THE NINE *Tuscaloosa, AL*

- Shipped four-plus client websites in five months, translating designs into pixel-accurate, responsive pages.
- Picked up the agency's proprietary CMS quickly by mapping it to prior CMS experience, staying on client deadlines.

Founder **February 2024 – June 2024**
NykoOptimizations *Tuscaloosa, AL*

- Ran a network optimization service for 50+ competitive gaming clients, from intake through delivery.
- Diagnosed and resolved latency and connectivity issues for 40+ clients across DMZ, port forwarding, static IP, Windows Firewall, Group Policy, and registry configuration.

PROJECTS

Incursion — Multiplayer Extraction Shooter (solo) **Luau, Roblox, Blender**

- Designed server-authoritative game systems — raid locking, rarity-weighted loot rolling, inventory, per-body-part armor, and an XP/economy loop — as modular services with client UI on top.
- Modeled, rigged, and exported custom 3D weapon assets in Blender for use in-engine.

HONORS & ACTIVITIES

Honors: Dean's List; Tutwiler, Alabama REACH, Alabama Advantage, Kirk Caponos, and Autherine Lucy Foster scholarships.
Activities: Alabama Information Management Society (AIMS); UA Space; Esports Club.
